

The Citi Para Swimming World Series

In 2023, there are nine Citi World Para Swimming World Series events

### Development & Classification

Begun in 2016, the Citi Para Swimming World Series (formerly, the WPS World Series) provides both international classification and competition opportunities. Swimmers, however, attend for the purpose of *either* classification *or* competition. Annually hosted in cities around the world, the World Series provides relatively consistent competition and classification windows with competitive fields. Swimmers' results are calculated using the WPS points system.

### Who and Where

Each World Series event has their own entry criteria, and what type of classification is offered (PI, VI, II) also differs between events.

**WHO IS ELIGIBLE ?** Any internationally classified swimmer, or swimmer going for their first international classification. Swimmers must be able to meet the entry requirements.

**WHERE ARE THEY ?** Locations can differ each year but Germany, Italy, Australia, and the USA are among the regular hosts.
